I have used this software on a few computers and have been very happy with it. I have a Windows Server 2008 R2 environment, and this software runs on windows XP/Vista/7/8/10 platforms, and has a great feature that saves a copy of all original emails (subject and body) and a copy of all saved emails (subject and body). The program is easy to use, it is very lightweight and has a very intuitive interface. There is an issue with Microsoft Outlook, which stores all emails in the %temp% folder. The software attempts to resolve this issue, but in reality it doesn't. I would recommend this program for anyone who uses multiple computers, including laptops and phone, and stores emails on a number of devices. So, if you use email, this software might be a great option for you. Note: I tried using 2 computers running windows xp and win7, and this software works fine. If you have a win8 or 10 computer, then you have to manually download and install the 64 bit version of this application.
