I am using the following code. `$date = '13/05/10'; echo date_format($date, 'D/M/Y');` I just get "01/01/1970". Any ideas? Thanks Nick A: `$date = '13/05/10'; echo date_format($date, 'D/M/Y');` 13/05/10 is not a valid date format, I believe that it should be something like `$date = '2013-05-10'`; Characteristics and

The application lets you easily extract digitized graphs. These graphs can come in many different formats such as .png, .svg, and .jpg. The application supports many different types of plots, and you can easily make adjustments to the parts of the graph by modifying their opacity. The application has a simple graphical interface, so you do not have to worry about dealing with complex code. You just need to select the graph, drag it, and start extracting the data. With this application, you can digitize graphs on the computer and then save them to your computer. You can then easily extract the data from these graphs by using any image editor. xyExtract Graph Digitizer is the only application that lets you easily extract the data from graphs, and that does not require a great amount of time. This package provides the only professional and reliable Bitmap Graphic Editor (BGE) for macOS. With BGE, you can quickly extract bitmap graphics from files as quickly and accurately as possible. It is simple to use, requires no professional programming skills, and is intuitive and fun to work with. BGE comes with thousands of curated databases including images from Adobe Stock, images with vector graphics, and objects with a sophisticated and precise selection filter. In addition, it supports most of the most popular image formats. You can use BGE to extract any type of bitmap graphics, such as GIF, PNG, JPG, and JPEG, regardless of the image size. Easily annotate the extracted bitmap with texts and shapes. And even save your work as a new file. You can also edit any image on Mac with BGE.
